

Ultra R-Panel is a polycarbonate panel that matches most corrugated metal profiles. It offers a wide range of resistance to corrosion, a non-combustible flame spread rating of 6, is UV resistant, will not yellow, turn brittle, or discolor, and stands up to harsh temperatures.

Insulated Panel Systems • Circle 108

The NaturalStone product line is comprised of naturally colored quartz

aggregates and manufacturing, resulting in a stunning stone appearance. Combined with state-of-the-art insulated metal panels, the building solution will boast the strength and efficiency of steel with the desired architectural finish. Products are available in four profiles and 10 colors.

Kal-Lite • Circle 109

Kal-Lite is a high-grade opaque, fiberglass reinforced plastic sheet, manufactured on a continuous laminating machine. It's recommended for wall or ceiling applications, as a full height liner or a scuff liner. It's available in a variety of thicknesses and widths and can be cut to any length. Kal-Lite is fire-rated: general purpose—Class C; low flame—Class A; and low flame and smoke—Class A.

Circle 110

The company's concrete siding provides builders the ability to add a masonry fascia without having to subcontract the work. Moderra is mortarless, eliminating all the inconveniences and costs of traditional masonry construction. Utilizing H-channel technology, Moderra saves time and money. Units are integrally colored and may be modified to create a variety of design elements. Walls display a natural split-face texture to complement any design.

Novabrik • Circle 111

Novabrik is a patented mortarless brick siding system. The high strength concrete bricks overlap and interlock to create a strong, water resistant brick veneer. Novabrik can be installed on wood studs, steel studs, and concrete structures. Application on innovative building systems like insulating con-

EVER SEEN SHEET METAL SWEAT?

Introducing the New Engage QX 36.

Looking for a way to strengthen your position in today's competitive sheet metal marketplace? Look no further. The Engage Rollformer is the most affordable in the industry!

- AG Panel machine -- \$110,000
- R Panel machine -- \$110,000
- 5V Crimp -- \$85,000
- Hurricane Shutter -- \$95,000

Our machines are complete with features you'd expect to find on more expensive machines so contact us today and start getting a stronger return on your sheet metal machinery investment.

Visit our e-Bay store at www.stores.ebay.com/Engage-Machinery for information on high-quality used machines.
